

# Community Improvement Plan (CIP) Program 13 Checklist

## Brownfield Environmental Site Assessment Rebate

If you are an applicant, please place a checkmark in the applicable boxes below.

### Program 13 Criteria:

The property is within the eligible area (see Part 3, CIP) AND

Provide a Phase I E.S.A. conducted by a Qualified Person indicating a requirement for a Phase II E.S.A.

### Additional Considerations:

All study fees are to be paid to the qualified consultant by the proponent. In order to receive the rebate(s) the proponent must submit the relevant invoices to the City.

Based on the principle of achieving maximum leverage of non-City funds, applicants who identify other sources of financial assistance for environmental site assessments will be given preference in the allocation of funds. Total combined assistance toward the costs of environmental site assessment from all public sources will not exceed 50% of total costs. City funding will be the funding of last resort where other sources of public assistance exist.
